**Subject:** Re: Bloom Still Lying About Efficiency To Investors  
**Attachments:** DOERR THE OLIGARCH.jpg

John

I don't think I have previously shared my slide of Doerr the Oligarch with Tim Cook of Apple so I am attaching it for Tim's benefit.

John

It is almost Qui Tam Time.

I give the Biden administration six months to indict and prosecute the Bloomdogglers or else WE THE PEOPLE will bring Qui Tam lawsuits from coast to coast.

GREEN LIES MATTER  
NO JUSTICE AND THEN QUI TAM

To the SEC and EPA

As part of the greenwashing investigation add this to the files at SEC and EPA

In September 2012 Bloom installed 50 fuel cells each of 200 kilowatts at Apple in Maiden NC

During the first full year of operation (2013) the fuel cells had an efficiency on a higher heating value basis of 51.11%.

In March 2020 Bloom installed a fuel cell at Fordham University and during its first 9 months of operation it has an efficiency on a HHV basis of 52.8%. In December 2019 Bloom installed 13 fuel cells in Brookside DE and for the year 2020 those fuel cells have an average efficiency of 51.6%.

You can see there has been no statically meaningful improvement in efficiency by Bloom over the past 7 years.

Yet Bloom lies to investors that efficiency of their fuel cells has shot up and is now over 65% on a lower heating value basis. This is FRAUD. This is deceptive advertising. This is GREENWASHING.
